# Tricentis

Enterprise Test Automation

Speed changes everything.

Today's enterprises are undertaking digital transformation to boost speed, agility, and innovation, while keeping an eye on costs. Yet, traditional software testing hasn't evolved with the new world of Agile and DevOps—not to mention the complexity of large, enterprise apps— and has become the #1 barrier to software release speed and agility. Enter Tricentis. We offer a new and fundamentally different way to tackle software testing, dramatically accelerating software delivery. Our approach is totally automated, fully codeless, and intelligent-

ly driven by AI. It addresses both agile development and complex enterprise apps—increasing software delivery speed, reducing costs, and improving quality. Now, testing takes just minutes or hours instead of days or weeks, while being far more cost effective and highly accurate. This kind of enterprise automation drives massive efficiency and speed gains. And the potential of digital transformation becomes abundantly clear.
Platform Benefits

ACCELERATE RELEASE SPEED

Leveraging artificial intelligence and the efficiencies of the cloud, you can accelerate software delivery by reducing test cycle times as much as 80%.

REDUCE TESTING COSTS

Our platform is AI-driven and codeless, helping you eliminate error-prone manual testing and achieve end-to-end test automation rates >90% to reduce costs.

INCREASE SOFTWARE QUALITY

Boost release confidence and obtain business risk coverage >85%. The quality of your software goes up. The stress of your day goes down.

AI-Powered Impact Analysis

With AI-powered impact analysis from **Tricentis Live-Compare**, you see exactly where the business risks lie in an application update. When paired with Tricentis Tosca or qTest, you can know which tests to run or create to verify that business processes will run flawlessly—reducing testing efforts by 85% and increasing release speed three-fold. Start accelerating release times by testing only what matters.
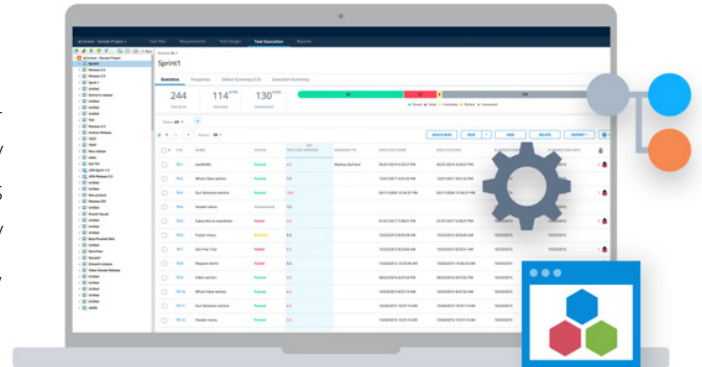

THE COCA-COLA COMPANY *"Tricentis LiveCompare ensures we're testing the right things and spending resources in the right places. When developing a regression test plan, the data received from LiveCompare allows us to more accurately tailor each plan to an individual release. Instead of testing everything, we test only what's impacted. That has translated into a direct resource savings of 30-40%."*

— **Ray Berry,** Application Development Lead for the SAP Platform

Agile Test Management

Tricentis qTest offers Agile Test Management solutions designed to improve speed, efficiency, and visibility throughout the software delivery lifecycle. qTest keeps teams connected with Test Management that seamlessly integrates with the most popular Agile and DevOps tools, such as Jira, Jenkins, Selenium, and more.

VERSIONONE Agile Made Easier

GLOBAL PAYMENTS *"When we had a legacy ALM, the automation scripts were standalone and there was no traceability. qTest's integration with the test automation tools has helped us develop a better approach for our requirements traceability matrix."*

— VP of Software Delivery Acceleration and Test Engineering

Make Test Automation More Productive

In a development world moving at the speed of DevOps, **Tricentis qTest** allows you to centrally scale test automation and machine management—maximizing the value of both open-source and proprietary automation tools.

- Orchestrate execution across tools and frameworks
- Increase your automation coverage
- Establish traceability to assess business risk

No-Code Automated Continuous Testing

Manual testing is the biggest roadblock to rapid software innovation. Tricentis Tosca's Model-Based test automation delivers 90%+ automation rates while significantly reducing maintenance. Easily automate your end-to-end testing across different applications and technologies—all while saving time and money.

AUTOMATE TESTING FOR YOUR MOST CRITICAL ENTERPRISE AND PACKAGED APPLICATIONS

SAP   salesforce   **ORACLE**   **servicenow**

VARIAN *"We've now used Tricentis test automation for 3 years for many enhancement pack and support pack upgrades, as well as for our SAP S/4HANA migration. Manual testing is simply not scalable. Test automation reduced testing time 93% and reduced testing costs 35%."*

– Head of Strategy For Testing Center of Excellence

Faster SAP Innovation

Tricentis automation lets key users stay focused on business while minimizing the disruption of SAP testing and post-go-live defects. With support for SAP ECC through SAP S/4HANA and beyond—plus SAP's cloud solutions—there's no better way to start your SAP automation journey.

SAP Silver Partner

ADVANCED ANALYTICS

Continuous Testing Analytics

With Tricentis, leverage advanced analytics for cross-project and portfolio level visibility.
- Consolidate all continuous testing metrics
- Elevate quality to the executive level
- Analyze activities across your Continuous Testing Platform

Why choose Tricentis?

It's simple. Our end-to-end automation platform is built for the enterprise from the ground up. Count on model-based automation with complete enterprise reporting and analytics from the world's leader.

FOLLOW THE LEADER
Tricentis has been named a leader by all the top analysts, including Gartner, Forrester, and IDC. With 1800 customers and proven success accelerating software delivery, we're the defacto market leader.

ENTERPRISE AWESOMENESS
Achieve resilient, end-to-end test and business process automation across any architecture or application stack at the speed of DevOps.

NO-CODE, AI-DRIVEN AUTOMATION
Our AI-driven and model based approach enables anyone to achieve automation — while eliminating typical maintenance headaches.

GLOBAL REPORTING/ ANALYTICS
Enjoy complete, end-to-end visibility across all tools in your software delivery lifecycle. Our centralized reporting equips you to speed up remediation while preventing future errors.
